Description

This is a small version basket that could be used for different purposes. The important feature of this basket is that its made by two different materials which are a Sprite can and 8 Sainsburys plastic bags. The combination of the two materials create an innovative aesthetic affect and also create a strong feature. Its use is not specified to any type of food or products with a purpose of giving the consumers freedom and excitement of choosing what this Metallic plastic fill-in is specifically for. Its light-weighted therefore it is easy to be carried around.
