Description

"Not Just A Rubbish Chair" is an upholstery and aesthetic style using ribbons of sandblasted plastic

PET drinks bottles. Used on chairs that would be otherwise thrown away; in order to create unique and desirable pieces of furniture that are sure to catch the eye. This project aims to show just what can be achieved with the process of a weave of plastic bottles in the hope that it will be taken on and adapted for the individual chair, table or any piece of furniture. This product is just an example of an aesthetic look that can be accomplished
